SUMMARY

Backend-focused full-stack developer with hands-on freelance experience shipping production platforms, including a Progressive Web App published on Google Play. Comfortable across the stack — Node.js/Express and TypeScript on the backend, React on the frontend — with growing DevOps practice: self-hosting CI/CD with Coolify, managing OAuth integrations, and running MySQL/PostgreSQL in production. BSc in Computer Science & Engineering. Seeking remote backend or full-stack roles.

EXPERIENCE

Freelance Full-Stack / Backend Developer

Feb 2026 – Present

SAMTrek — Remote (IT services agency, Germany)

- Built and shipped Vaaii, a peer-to-peer cross-border delivery marketplace, as a Progressive Web App also published on the Google Play Store, connecting international travelers with people who need cross-border package delivery.
- Building Medilog24, a medical document management platform launching this month: set up a two-repo (API + app) architecture with separate dev/prod environments, self-hosted CI/CD via Coolify with GitHub webhook auto-deploys, Google OAuth + Drive API integration for secure document storage, and a MySQL database with automated migrations.
- Delivered shopnojhuri.com, a WordPress/WooCommerce e-commerce platform, including category structure and a colour-variant product selection system.
- Built sam-trek.com, the agency's corporate website.
- Architected the backend (NestJS, Prisma, MySQL) for a multi-business accounting and invoicing platform: JWT authentication, a double-entry-ready transaction ledger, PDF invoice generation, and a time-limited collaborative access-sharing system, with unit tests covering auth and access-control logic; built the companion React/TypeScript frontend.

PERSONAL PROJECTS

WorkStationX — C#, WPF, .NET, EF Core, SQLite, xUnit

- Windows desktop app that switches your entire work context — apps, browser profiles, websites — with one shortcut; includes a countdown task timer and screen-capture tools. Dependency injection, EF Core/SQLite persistence, 183 automated unit tests. github.com/muhit-1/WorkStationX

KrishiHat — Next.js, TypeScript, Prisma, MariaDB

- Full-stack agricultural marketplace connecting Bangladeshi farmers with buyers, supporting fixed-price and auction sales across 5 role-based dashboards; JWT auth with refresh tokens, bilingual (English/Bengali) UI. github.com/muhit-1/KrishiHat

Dhaka Bus Navigator — React, Vite, Leaflet, Supabase

- Route-planning web app for Dhaka's bus network with fare/time estimation and interactive maps; PostgreSQL backend with Row-Level Security. github.com/muhit-1/dhaka-bus-navigator

SKILLS

Languages: JavaScript/TypeScript, Python, Java, Kotlin, C#, PHP, SQL

Frontend: React, Next.js, Svelte, HTML/CSS, Tailwind CSS

Backend: Node.js, Express, NestJS, Django, Laravel

Databases & ORMs: PostgreSQL, MySQL/MariaDB, MongoDB, Redis, Supabase, Prisma, EF Core

Testing & DevOps: xUnit, Vitest, Docker, Coolify (self-hosted CI/CD), Git, Linux, Nginx, GitHub Actions/Webhooks

Other: Firebase, Google OAuth & Drive API, JWT Auth, WordPress/WooCommerce

EDUCATION

BSc in Computer Science & Engineering

2022 – 2026 (Graduated)

Bangladesh University of Business and Technology (BUBT)

Languages: English — Full Professional Proficiency | Bengali — Native
